## What is Claimed is:

1. A medicament having inhibitory activity against NF-  $\kappa$  B activation which comprises as an active ingredient a substance selected from the group consisting of a compound represented by the following general formula (I) and a pharmacologically acceptable salt thereof, and a hydrate thereof and a solvate thereof:

wherein A represents hydrogen atom or acetyl group,

E represents a 2,5-di-substituted or a 3,5-di-substituted phenyl group, or a monocyclic or a fused polycyclic heteroaryl group which may be substituted, provided that the compound wherein said heteroaryl group is ① a fused polycyclic heteroaryl group wherein the ring which binds directly to -CONH- group in the formula (I) is a benzene ring, ② unsubstituted thiazol-2-yl group, or ③ unsubstituted benzothiazol-2-yl group is excluded,

ring Z represents an arene which may have one or more substituents in addition to the group represented by formula -O-A wherein A has the same meaning as that defined above and the group represented by formula -CONH-E wherein E has the same meaning as that defined above, or a heteroarene which may have one or more substituents in addition to the group represented by formula -O-A wherein A has the same meaning as that defined above and the group represented by formula -CONH-E wherein E has the same meaning as that defined above.

- 2. The medicament according to claim 1, wherein A is a hydrogen atom.
- 3. The medicament according to any one of claims 1 or 2, wherein ring Z is a C<sub>6</sub> to C<sub>10</sub> arene which may have one or more substituents in addition to the group represented by formula -O-A wherein A has the same meaning as that defined in the general formula (I) and the group represented by formula -CONH-E wherein E has the same meaning as that defined in the general formula (I), or a 5 to 10-membered heteroarene which may have one or more substituents in addition to the group represented by formula -O-A wherein A has the same meaning as that defined in the general formula (I) and the group represented by formula -CONH-E wherein E

has the same meaning as that defined in the general formula (I).

- 4. The medicament according to claim 3, wherein ring Z is a benzene ring which may have one or more substituents in addition to the group represented by formula -O-A wherein A has the same meaning as that defined in the general formula (I) and the group represented by formula -CONH-E wherein E has the same meaning as that defined in the general formula (I), or a naphthalene ring which may have one or more substituents in addition to the group represented by formula -O-A wherein A has the same meaning as that defined in the general formula (I) and the group represented by formula -CONH-E wherein E has the same meaning as that defined in the general formula (I).
- 5. The medicament according to claim 4, wherein ring Z is a benzene ring which is substituted with halogen atom(s) in addition to the group represented by formula -O-A wherein A has the same meaning as that defined in the general formula (I) and the group represented by formula -CONH-E wherein E has the same meaning as that defined in the general formula (I).
  - 6. The medicament according to claim 4, wherein ring Z is a naphthalene ring.
- 7. The medicament according to any one of claims 1 to 6, wherein E is a 2,5-di-substituted phenyl group or a 3,5-di-substituted phenyl group.
- 8. The medicament according to claim 7, wherein E is a 2,5-di-substituted phenyl group wherein at least one of said substituents is trifluoromethyl group, or a 3,5-di-substituted phenyl group wherein at least one of said substituents is trifluoromethyl group.
- 9. The medicament according to claim 8, wherein E is 3,5-bis(trifluoromethyl)phenyl group.
- 10. The medicament according to any one of claims 1 to 6, wherein E is a monocyclic heteroaryl group which may be substituted or a fused polycyclic heteroaryl group which may be substituted, provided that the compounds wherein said heteroaryl group is a fused polycyclic heteroaryl group wherein the ring which binds directly to -CONH- group in the formula (I) is a benzene ring are excluded.
- 11. The medicament according to claim 10, wherein E is a 5-membered monocyclic heteroaryl group which may be substituted.
- 12. The medicament according to any one of claims 1 to 11, which is an inhibitor against expression of a gene for one or more substances selected from the

following substance group  $\delta$ :

[Substance group  $\delta$ ] tumor necrosis factor (TNF), interleukin-1, interleukin-2, interleukin-6, interleukin-8, granulocyte colony-stimulating factor, interferon  $\beta$ , cell adhension factor ICAM-1, VCAM-1, ELAM-1, nitricoxide synthetase, major histocompatibility antigen family class I, major histocompatibility antigen family class II,  $\beta$  2-microglobulin, immunoglobulin light chain, serum amyloid A, angiotensinogen, complement B, complement C4, c-myc, transcript derived from HIV gene, transcript derived from HTLV gene, transcript derived from simian virus 40 gene, transcript derived from cytomegalovirus gene, and transcript derived from adenovirus gene.

- 13. The medicament according to any one of claims 1 to 11, which is an inhibitor against production and release of an inflammatory cytokine or an immuno suppressive agent.
- 14. The medicament according to any one of claims 1 to 11, which is used for preventive and/or therapeutic treatment of chronic rheumatism.
